

Websites

A website is a company, person or place on the Internet. A website can be informative, instructive and entertaining. It should represent what you do, who you are and how you interact with your audience. Following are representative samples of websites that I have created.

Data to charts in one click!

A new, quick, simple way to make lots of charts.

WHO WE ARE

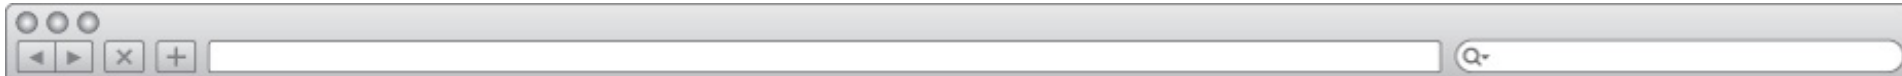

Hammerhead Systems is the market leader in Layer 2.5 Aggregation, Interworking and Migration solutions to accelerate the profitable delivery of new Ethernet and existing legacy services at a fraction of the cost and complexity of other solutions. Hammerhead's solutions address three major markets: Business Services, Residential Broadband, and Wireless Backhaul. Hammerhead's solutions include its carrier grade flagship platform, the HSX 6000 Layer 2.5 Aggregation Switch, and its full-featured Pegador SOA Element Management System. Hammerhead serves customers ranging from Tier 1 and Tier 2 global carriers, PTTs, national and regional service providers, to wireless operators and MSOs.

s o l u t i o n

infolio Mobile Enterprise Platform™

Easily create, deploy and maintain next generation mobile enterprise applications

The Mobile Enterprise Platform (MEP) is a powerful new addition to your existing enterprise infrastructure. MEP allows enterprises to deliver powerful mobile productivity applications to their knowledge workers, business partners and customers. infolio collectively refers to these mobile applications as the Mobile Productivity Suite. The Mobile Productivity Suite is a set of packaged mobile enterprise applications that allow for device based interaction with vital enterprise information and workflow. MEP provides an easy to use graphical environment so that IT and functional users can deploy, personalize and administer the Mobile Productivity Suite.

Intelio is the leader in Remote Workplace Management.

Leveraging core technology that our design team developed for the \$9 billion Western States Power Grid, Intelio is extending and applying that technology to improve the operational and financial performance of multi-site retail businesses.

Intelio combines the disciplines of information technology, security with remote video, and electro-mechanical operations to create a holistic network that:

- provides actionable business information in real time
- accelerates growth by enabling management of more sites with existing staff
- allows you to do it from anywhere via the Internet
- increases Return on Investment and Return on Life!

Intelio's hardware and software collects raw data from remote monitoring devices attached to infrastructure equipment, including business machinery, security cameras, communications hardware and point-of-sale systems. That data is securely transmitted to our network operations center, where Intelio applies advanced algorithms and artificial intelligence to transform raw data into valuable business intelligence which can be accessed from anywhere with a web browser via a secure, customized portal.

Mark VII WashNet Powered by Intelio is now shipping through our partnership with Mark VII Equipment, Inc., which sells a complete line of car wash solutions, including touch-free rollover, tunnel and self-service systems, as well as chemicals, ancillary products and service agreements. Click below for more information about the WashNet solution for remote car wash management:

Sport Flash Cards Instructional Aids

[HOME](#)[PRODUCTS](#)[ABOUT US](#)[CONTACT](#)

For coaches

As a coach you already know what to teach your athletes. Plazat™ Flash Cards provide you with clear, straightforward visuals to assist you in teaching the fundamentals. Use the Plazat Flash Cards to show your athletes where to play, what play to make in what situation, where to play on offense and defense, plus many additional scenarios. Nothing takes the place of actual playing time but adding Plazat Flash Cards to your methodology increases retention and encourages thoughtful discussion.

For parents

Do you have children who want to play a sport? Plazat Flash Cards are perfect for learning where each position should play, where to throw, kick or hit the ball when the play comes to them. Plazat Flash Cards are great reinforcement for kids that already play too.

For kids

If you like playing sports, Plazat Flash Cards are for you. Take a quick look at each card and you will see an information scoreboard at the bottom. Check the scoreboard for the play and look at the field of play for what to do next. Each card shows you exactly what to do whether you are on offense or defense. Plazat Flash Cards were created with you in mind to help you learn the game.

“ Music begins where words end. Through music we can
better communicate and express ourselves. At the San Jose
Youth Symphony, we expose young people to the magical
powers of music. ”

Yair Samet

Music Director and Conductor

Every year, over 400 young musicians from across Silicon Valley participate in several of the programs offered by the San Jose Youth Symphony. The San Jose Youth Symphony comprises six distinct performing ensembles: two full orchestras, two string ensembles, flute and percussion ensembles. Each ensemble performs three subscription concerts every season in San Jose.

Philharmonic Orchestra

The Philharmonic Orchestra is the premiere ensemble of the San Jose Youth Symphony. [MORE >](#)

Concert Orchestra

The Concert Orchestra provides intermediate musicians the opportunity to learn rehearsal techniques and performance practices in a full orchestral setting. [MORE >](#)

Avant Flute Choir

The Avant Flute Choir is for advanced student flute players. In this ensemble young musicians learn a variety of music specifically for flute, as well as arrangements of standard orchestra music. [MORE >](#)

Percussion Ensemble

The Percussion Ensemble offers an opportunity for percussionists to perform percussion ensemble music from the 20th and 21st centuries. [MORE >](#)

Intermezzo String Ensemble

The goal of this string ensemble is to prepare young musicians for progression to playing in a full orchestra. [MORE >](#)

Prelude String Ensemble

This ensemble provides a high quality introduction to important concepts

Welcome to the Sunday Only Golf Club website. We are an associate member club, registered with the Northern California Golf Association. And since we are based in Silicon Valley, nothing would be more appropriate than to be a virtual club too. Club members can use this site to keep current with club events, statistics and rules, as well as find out about our heritage, how the club got it's start and what the future holds. Speaking of the future, soon you will be able to sign up and even pay for the tournaments online, and purchase Sunday Only Golf Club related gear such as hats, wind jackets, towels, etc. For anyone interested in becoming a new member, click on the Sign Up link to the right and follow the instructions from there. Thank you for visiting us on the Internet.

[About Us](#)

Sylantro Systems enables telecommunications service providers to offer innovative, revenue generating IP-based voice communication services to their subscribers.

As web, voice, mobility, media, and content all come together in the new world of converged user experiences and expectations, service providers are constantly challenged on price, performance, and features to remain competitive. Our industry leading Synergy Multiplay Application Feature Server platform coupled with our Synapps Web Services offers a powerful combination of reliability, scale, and flexibility that allows operators to meet these challenges head-on with a single investment.

We are an innovative global organization headquartered in the heart of Silicon Valley. We have brought together some of the best and the brightest in telephony, IT, Internet, marketing, solutions, and services with one and only one purpose – to reinvent voice and help it retain its trusted role in everyday communications.

Hundreds of service providers trust us today to run the core of their business and residential voice communication services across fixed, mobile, and converged IMS networks.

The Real Time Enterprise

The age of the real time enterprise is here. As companies strive to achieve greater responsiveness and agility for today's dynamic business environment, the Enterprise Service Bus enables distributed systems, integrated legacy applications and business partner applications to be integrated with unprecedented flexibility. Based on open standards, event messaging and loosely coupled software services, this next-generation integration architecture supports even the most complex enterprise business processes—and maintaining its availability and performance is now a mission-critical requirement.

Reliable Management and Control

Real Time Knowledge enables the real time enterprise. Our performance management and monitoring technologies help companies ensure a high level of availability along the Enterprise Service Bus backbone and throughout the entire messaging and integration infrastructure. As new business needs and technologies emerge, we provide our customers with reliable management and control for the seamless introduction of additional applications, services and platforms.

Technical Expertise and Innovation

Founded in 2003, Real Time Knowledge brings deep technical expertise in application performance management, innovation and entrepreneurial drive to the challenges and opportunities of the real time, event driven enterprise.
